2 Release Notes

There is a release of the ISWC database software planned for Thu, 4th Jan @ 10:30AM CET. The expected service interruption for the production release is less than thirty minutes.

The purpose of this release is to introduce some new features. It also contains miscellaneous minor bug fixes. This release does contain a REST API change so if you integrate directly with the REST API you should consider a quick smoke test in UAT. More details on this change are listed in section 2.4 Features below.

2.1. Communication

These release notes are now finalised. A copy of these release notes will be emailed to all email addresses that have an active subscription to the REST API in production as follows:

To get the latest API definition use the API definition button in the developer portal as per the figure below.

The screenshot shows the ISWC Network developer portal. The header includes the ISWC Network logo and navigation links: HOME, APIS, PRODUCTS, ABOUT THE ISWC DATABASE, and a user profile for JOHN CORLEY. The main content area displays the 'ISWC Database Agency REST API' page. On the left, there is a search bar and a list of API endpoints with their methods: POST (Add a batch of new ISWC submissions to the database), POST (Add a new ISWC submission to the database), POST (Allocate a batch of new ISWC submissions), and DELETE (Delete a set of). The main content area shows the 'ISWC Database Agency REST API' title, a link to 'API change history', and the endpoint 'ISWC Database Agency/Society REST API'. Below this, there is a section for 'Add a batch of new ISWC submissions to the database' with a 'Try it' button and a 'Request' section. A yellow button labeled 'API definition' is located in the top right corner of the main content area.
